

# Introducing Cyngn's Enterprise Autonomy Suite ("EAS")

EAS enables organizations to autonomously transfer goods and materials throughout their facilities. With EAS, workers can reallocate time spent driving around the facility toward higher value tasks - optimizing labor, improving productivity, and increasing overall output.

## AUTONOMOUS FINISHED GOODS TRANSFER

### Step 1

Worker finishes assembly job and is ready to send finished goods to the next station.

### Step 2

Worker uses a tablet to call the Autonomous Stockchaser.

### Step 3

Vehicle arrives, and goods are loaded onto the Autonomous Stockchaser's cart.

### Step 4

Worker sends the Autonomous Stockchaser to the Staging Area using the on-vehicle display.

### Step 5

After arriving at the Staging Area, the Autonomous Stockchaser is unloaded and ready for its next job.

## AUTONOMOUS POINT-TO-POINT TRANSFER

### Step 1

Pack team member finishes packing orders onto a pallet and uses the tablet to call the Autonomous Stockchaser.

### Step 2

Vehicle arrives, and the orders are loaded onto the Autonomous Stockchaser's cart.

### Step 3

Worker sends the Autonomous Stockchaser to the Outbound Staging Area using the on-vehicle display.

### Step 4

After arriving at the Outbound Staging Area, the Autonomous Stockchaser is unloaded and ready for its next job.

## AUTONOMOUS PICKING TO PACKING

### Step 1

Pick team member completes a pick order and places the order onto a pushcart.

### Step 3

The Autonomous Stockchaser arrives and is loaded with the order.

### Step 4

Worker sends the Autonomous Stockchaser to the Packing Area using the on-vehicle display.

### Step 5

After arriving at the Packing Area, the Autonomous Stockchaser is unloaded and ready for its next job.

## AUTONOMOUS WORK CELL DELIVERY

### Step 2

The Autonomous Stockchaser is loaded with raw materials.

### Step 5

The worker sends the Autonomous Stockchaser back to the Raw Materials Area.

### Step 1

Worker depletes the supply of their materials.

### Step 3

Worker calls the Autonomous Stockchaser using a tablet.

### Step 4

The Autonomous Stockchaser navigates to the workcell and is unloaded.

## AUTONOMOUS LONG HAUL INVENTORY REPLENISHMENT

### Step 1

Worker loads inventory onto the Autonomous Stockchaser's cart.

### Step 2

Worker sends the inventory to the appropriate rack.

### Step 4

Forklift driver sends the Autonomous Stockchaser back to inventory.

### Step 3

Autonomous Stockchaser arrives in the aisle to be unloaded by a forklift.
